2. About EFRAG ([www.efrag.org](http://www.efrag.org))

a. The European Financial Reporting Advisory Group’s (EFRAG) mission is to serve the European public interest by developing and promoting European views in the field of financial reporting and ensuring these views are properly considered in the IASB standard-setting process and in related international debates. EFRAG ultimately provides advice to the European Commission on whether newly issued or revised IFRS meet the criteria in the IAS Regulation for endorsement for use in the EU, including whether endorsement would be conducive to the European public good. EFRAG stimulates innovation in corporate reporting through the European Reporting Lab@EFRAG’s work in sharing good practices, which also complements and contributes to our work on financial reporting.

b. EFRAG seeks input from all stakeholders, and obtains evidence about specific European circumstances, throughout the standard-setting process and in providing our endorsement advice. Our legitimacy is built on transparency, governance, due process (which may include field tests, impact analyses and outreaches), public accountability and thought leadership. This enables EFRAG to speak convincingly, clearly and consistently, and be recognised as the European Voice in financial reporting.
