

European Financial Reporting Advisory Group ■

EFRAG, ANC & FRC Discussion Paper:
*Towards a Disclosure Framework for the
Notes*

12 July 2012

Background to the Project

Why we have issued this Discussion Paper

- **The objectives of this Discussion Paper are:**
 - identify what disclosures are relevant for the notes to the financial statements;**
 - discuss what materiality means from a disclosure perspective; and**
 - develop a set of principles for good communication of disclosures.**
- **We have developed some suggestions for a Disclosure Framework for the Notes to the financial statements.**
- **The objective of the Disclosure Framework is to ensure that all and only relevant information is disclosed in an appropriate manner, so that detailed information does not obscure relevant information in the notes to the financial statements.**
- **The comment period closes on 31 December. Please send comments to commentletters@efrag.org**

□ Key Principles in the Discussion Paper

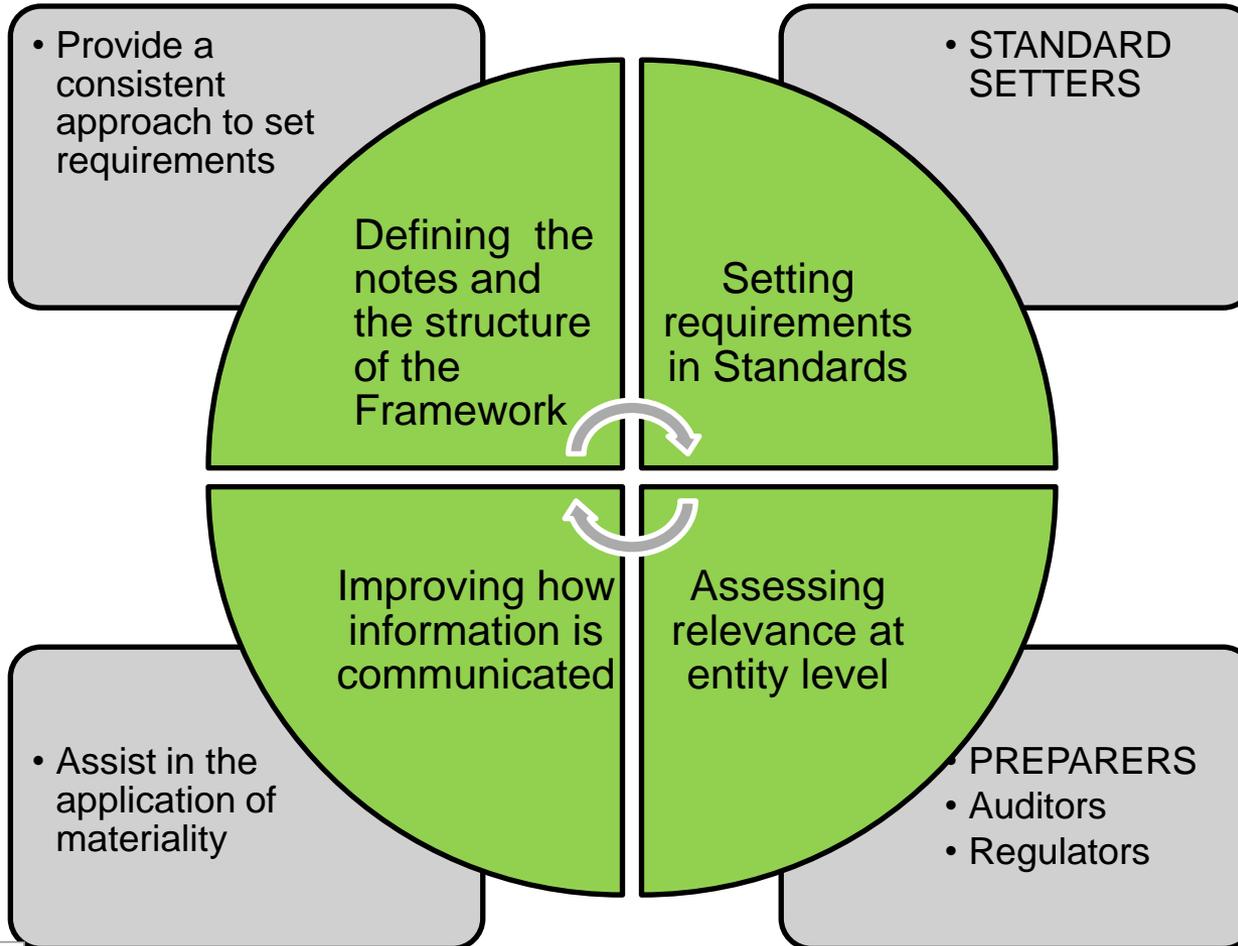

What we have said

- A number of Key Principles have been identified on:

• Purpose and content of the notes	• Setting disclosure requirements
• Applying the requirements	• Communicating information

Overview of the Framework

HOW DOES THE FRAMEWORK HELP?

WHO IS THE MAIN ACTOR?

Setting the requirements

The purpose of the notes is to provide relevant description of the items presented in the primary financial statements and of unrecognised arrangements, claims against and rights of the entity that exist at the reporting date.

Notes provide information on

Aggregation/
disaggregation of line
items

What the item is

How the item fits in the
entity's operations and
financial structure

How the item has been
accounted for

Indicators are suggested to assess when this information is relevant

□ Applying the requirements

What we have said

- **The Framework suggests that not all information around a material item is necessarily material.**
- **The Framework suggests a number of indicators to guide in the assessment of materiality of each information.**

Communicating information

What we have said

- **Quality of information is not only about the “what” is disclosed, but also “how”.**
- **The Discussion Paper suggests that information in the notes should meet these principles:**

Be entity-specific

Be current

Inform and explain the substance of transactions

Be organised

Be clear, balanced, concise and written in plain language

Be linked
