

EFRAG Mapping of Digital Tools Report

KEY TAKEAWAYS 2025

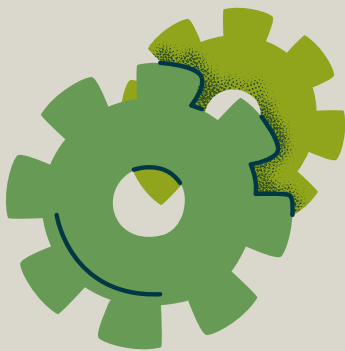

WHAT WAS MAPPED?

- GHG calculators
- Geolocation tools
- Water stress tools
- Biodiversity sensitive area tools

KEY TAKEAWAYS:

- Following the criteria mentioned in Chapter 2 of this report, 12 out of 100 (12%) tools were shortlisted.
- A comprehensive technical quality check should be carried out to better understand the functionalities, accuracy and usability of each tool.
- The shortlisted tools are referenced on EFRAG's website and will be updated periodically.

UNDERREPRESENTED AREAS

- Geolocation tools
- Water stress tools
- Biodiversity tools

POSSIBLE FUTURE SCENARIOS

- Encourage Member States to develop & promote tools for geolocation, water stress & biodiversity.
- EFRAG also encourages cross fertilisation and possible development of GHG calculators applicable at the European Union level free of charge.
